NASA Safety News

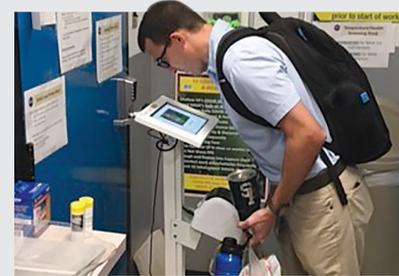

## Caught Doing *Right* Across the Agency

NASA employees have been caught demonstrating safety procedures, reinforcing the proper use of safety equipment and encouraging others to practice safe behaviors. See someone using good safety measures? Snap a photo and submit it to the Safety Culture web page! [sma.nasa.gov/CDR](http://sma.nasa.gov/CDR)

**Wallops Flight Facility:** Four Northrop Grumman engineers wore proper Personal Protective Equipment and face masks as they social distanced while loading the Northrop Grumman Corporation Antares vehicle onto Pad 0A.

**Stennis Space Center:** John Horner used the Wellness Kiosk to record his temperature and respond to questions before starting to work on the A-1 Test Stand.

**Headquarters:** Sharon Sutton followed COVID-19 safety protocols while she was measured for an ergonomic chair to bring home to help prevent back pain and injury.

**Armstrong Flight Research Center:** Lyndel Loehberger followed center COVID-19 safety protocols by wearing the proper Personal Protective Equipment (facemask, face shield and gloves) while performing a fan blade inspection of an engine prior to installation.

**Goddard Space Flight Center:** Leslie Spain performed a temperature check on another center employee before he was cleared to enter.

**Jet Propulsion Laboratory:** Work continued for the Division 347 Robotics Group outdoors with social distancing, masks and Plexiglass barriers.

**Marshall Space Flight Center:** Center employees followed all protocols — including wearing face coverings and keeping a distance from one another — while performing a tank inspection.

**Langely Research Center:** Ewan Crosbie and Eddie Winstead followed all COVID-19 safety protocols to keep themselves and everyone around them safe as they prepared their instruments for an upcoming research mission for the ACTIVATE flight campaign in the NASA 524 airplane.

**Kennedy Space Center:** Jeff Hibshman wore a face covering and gloves to provide contactless delivery of a package to Jo Santiago-Bond.

**Independent Verification and Validation Facility:** After having his temperature checked prior, one IT technician provided IT support to the Protective Services Group while keeping a distance of 6 feet and properly wearing a face covering.

**Michoud Assembly Facility:** Boeing technicians safely prepared to spray the CS2 LOX tank at Cell N wearing the proper Personal Protective Equipment.
